Solar radiation is always partially transmitted through, absorbed or reflected by the fabric. The sum of all equals 100.

Ts + Rs + As = 100% of solar energy

Die Sonnenstrahlung wird vom Gewebe teilweise durchgelassen, absorbiert oder reflektiert. Die Summe aller drei Faktoren ergibt 100.

Ts + Rs + As = 100% Sonnenenergie

Le rayonnement solaire est en partie transmis à travers, absorbé ou réfléchi par le tissu. La somme de tous les 3 est de 100.

Ts+Rs+As = 100% d'énergie solaire.

	glossy	grey	silver-black	charcoal	silver	silver-white	white	beige	chestnut	tan
Ts	9	6	5	6	13	18	27	16	3	8
Rs	43	22	34	7	53	50	65	47	9	27
As	48	73	61	87	34	32	8	37	89	65
Tv	7	4	4	4	12	26	23	11	3	5

Ts | Solar transmittance: proportion of solar energy transmitted through the fabric. A low percentage means the fabric performs well at reducing solar energy.
Absorptionsfaktor: der Anteil, der das Gewebe durchdringenden Sonnenstrahlung. Je geringer dieser Wert ist, umso höher ist der vom Gewebe abgefangene Anteil der Sonnenenergie.
La transmission solaire: la proportion de l'énergie solaire transmis à travers un tissu. Un pourcentage bas indique que le tissu fonctionne bien pendant la réduction de l'énergie solaire.

Rs | Solar reflectance: proportion of solar radiation reflected by the fabric. A high percentage means the fabric performs well at reflecting solar energy.
Reflexionsfaktor: der Anteil, der vom Gewebe reflektierten Sonnenstrahlung. Je höher dieser Wert ist, umso höher ist der vom Gewebe reflektierte Anteil der Sonnenenergie.
La réflexion solaire: la proportion du rayonnement solaire qui est réfléchi par le tissu. Un pourcentage élevé indique que le tissu fonctionne bien pendant la réflexion de l'énergie solaire.

As | Solar absorbance: proportion of solar radiation absorbed by the fabric. A low percentage means the fabric absorbs little solar energy.
Absorptionsfaktor: der Anteil, der vom Gewebe selbst absorbierten Sonnenstrahlung. Je niedriger dieser Wert ist, umso niedriger liegt auch der vom Gewebe selbst absorbierte Anteil der Sonnenenergie.
L'absorption solaire: la proportion du rayonnement solaire absorbée par le tissu. Un pourcentage bas indique que le tissu absorbe peu de l'énergie solaire.

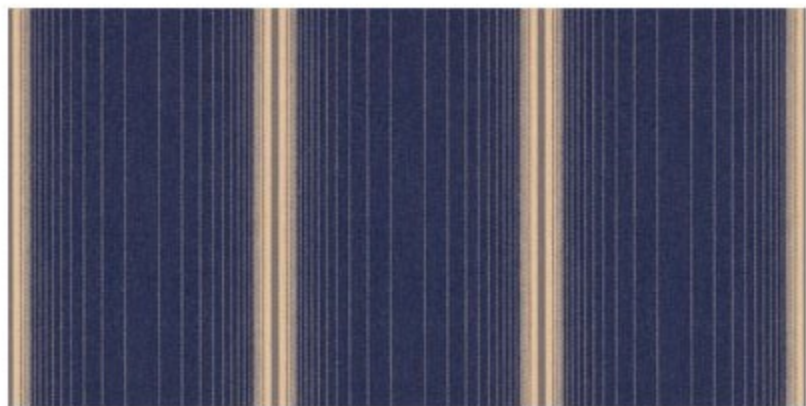

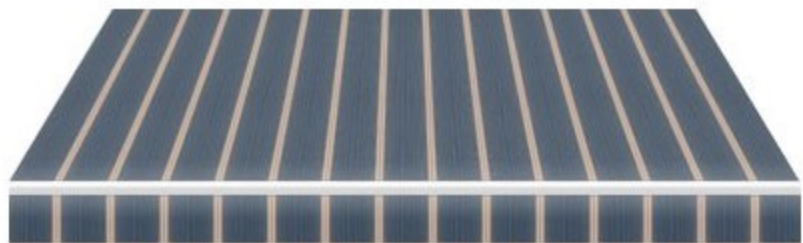

Tv | Visible light transmittance: total percentage of light radiated through the fabric over a wavelength of 380 to 780 nm (nanometers), called the visible spectrum (total illumination).
Durchlässigkeit im sichtbaren Bereich: Dieser Faktor gibt den Gesamtanteil der vom Gewebe durchgelassenen Lichtstrahlung, mit einer Wellenlänge zwischen 380 und 780 nm (Nanometer) auch sichtbares Spektrum genannt, an (totale Beleuchtungsstärke).
Transmission lumineuse visible: pourcentage total de rayonnement lumineux traversé par le tissu sur une longueur d'onde de 380 à 780 nm (nanomètres), appelé spectre visible (éclairage total).
