Original SHYZIP®

You will find SHY Products on Windows Around the World.

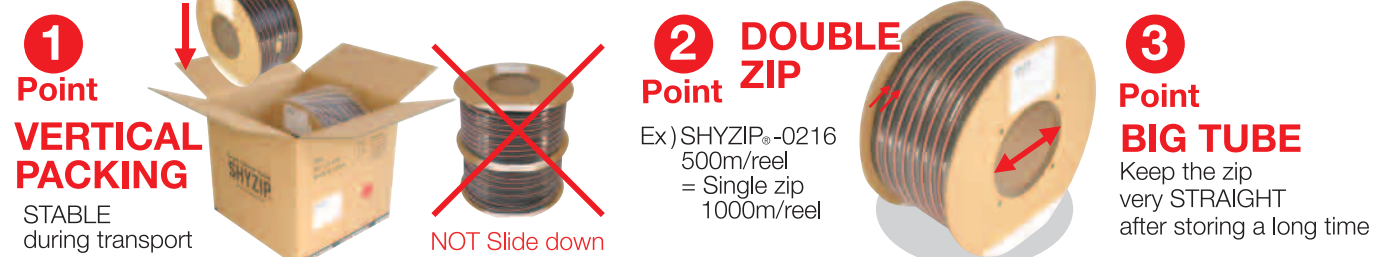

Inventor
Seizo Hayashiguchi (1940~)
Invented "ZIP System" in 1985.
Chairman of SHY CO., LTD.

Stable Straight SHYZIP®

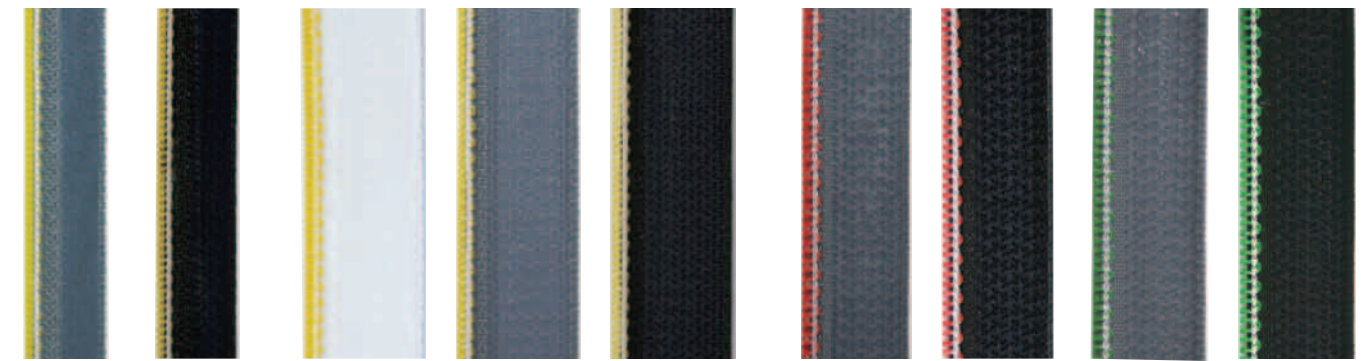

Usable for each scenes, and situations.

Past sales more than 2,500,000m/year.

Safe and stable package

SHYZIP® Made in Japan Design for good reason

Specifications

	SHYZIP® Mini	SHYZIP® Standard	SHYZIP® Strong
Element Thickness (A)	1.7	1.7	1.9
Element Width (B)	2.5	2.5	3.2
Strip Width (C)	9.8	14.8	14.3
Strip Thickness (D)	0.6	0.6	0.7
PVC film Thickness (E)	*120 μm	60 μm	60 μm
PVC film Width (F)	6.0	12.0	12.0

* PVC film of Mini is 2 times thicker than that of Standard to keep the welding strength.

Tensile Strength (Measured value)

SHYZIP® - 0203/0216 (with yellow elements)

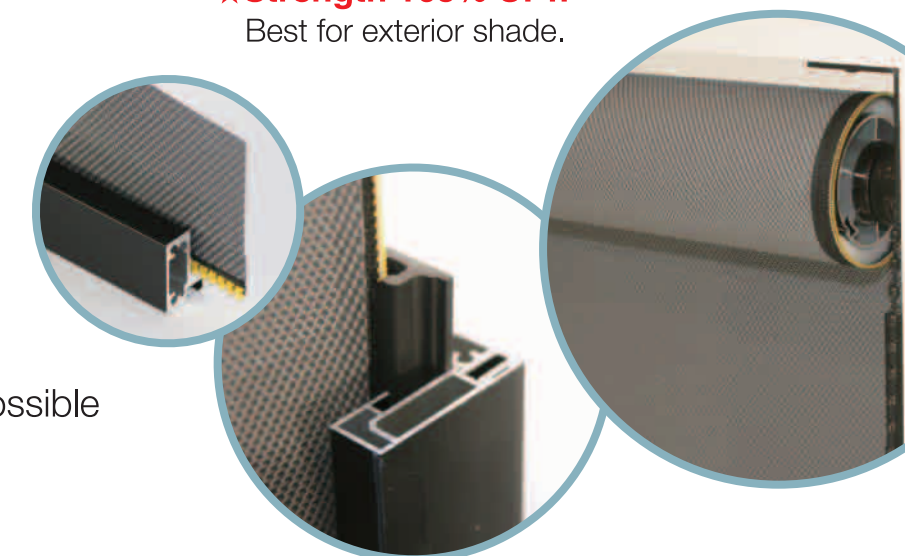

Element Thickness : 1.7mm
Tensile Strength : 25.2kg/30mm

SHYZIP® - 0450/0451 (with red / green elements)

Element Thickness : 1.9mm
Tensile Strength : 41.0kg/30mm

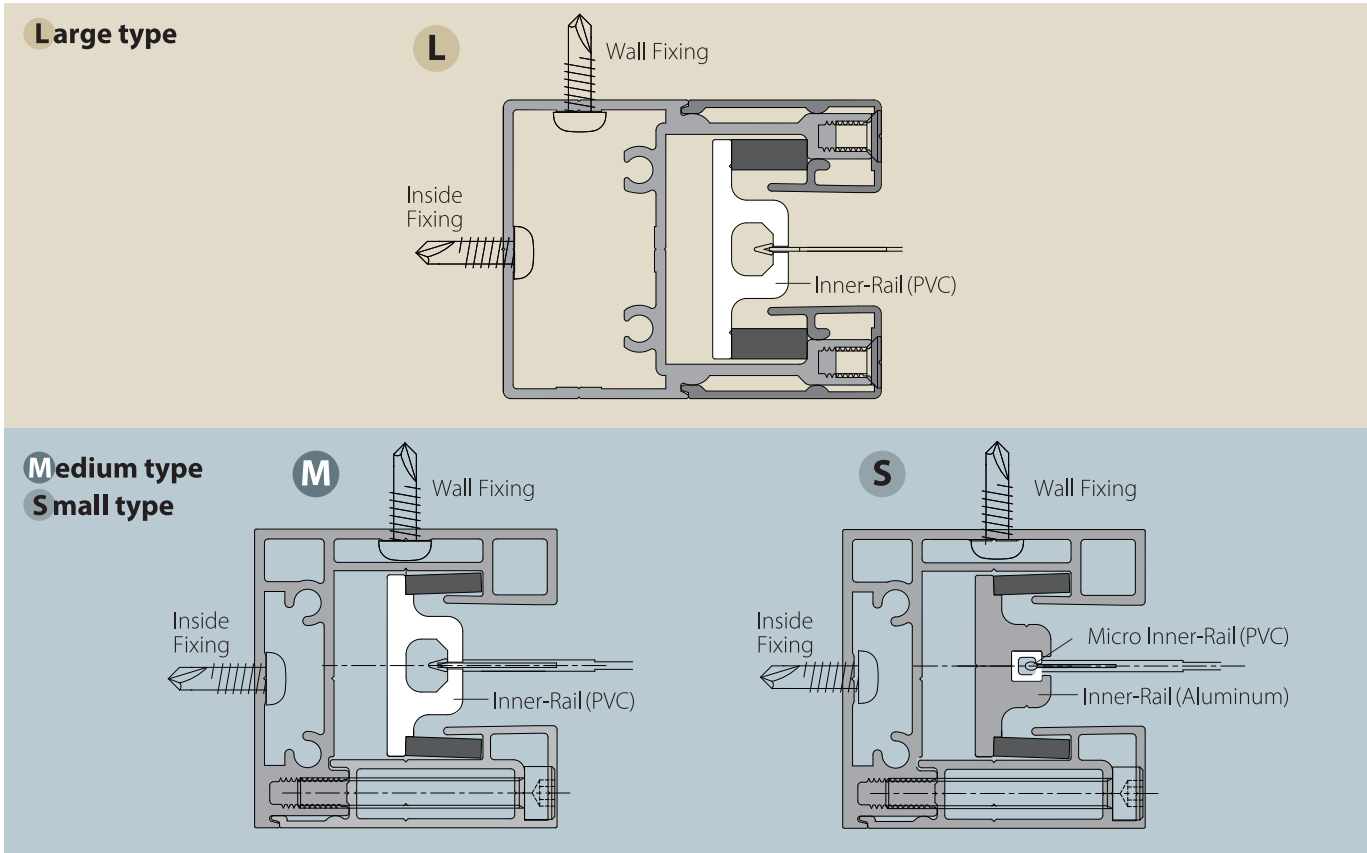

★**Strength 163% UP!!**
Best for exterior shade.

- Easy Operation
- Light Cut-off
- Energy Saving
- Noise Cut-off
- Sag Prevention
- Scattering Prevention
- Bug Cut-off
- Multi-purpose Design Possible
- Easy Maintenance
- Large Size Possible
- Dust etc Shutting Off

ZIP System

ZIP System is a screen system that can shut off openings perfectly with compact guide rail unit and SHYZIP®.

Guide-Rail

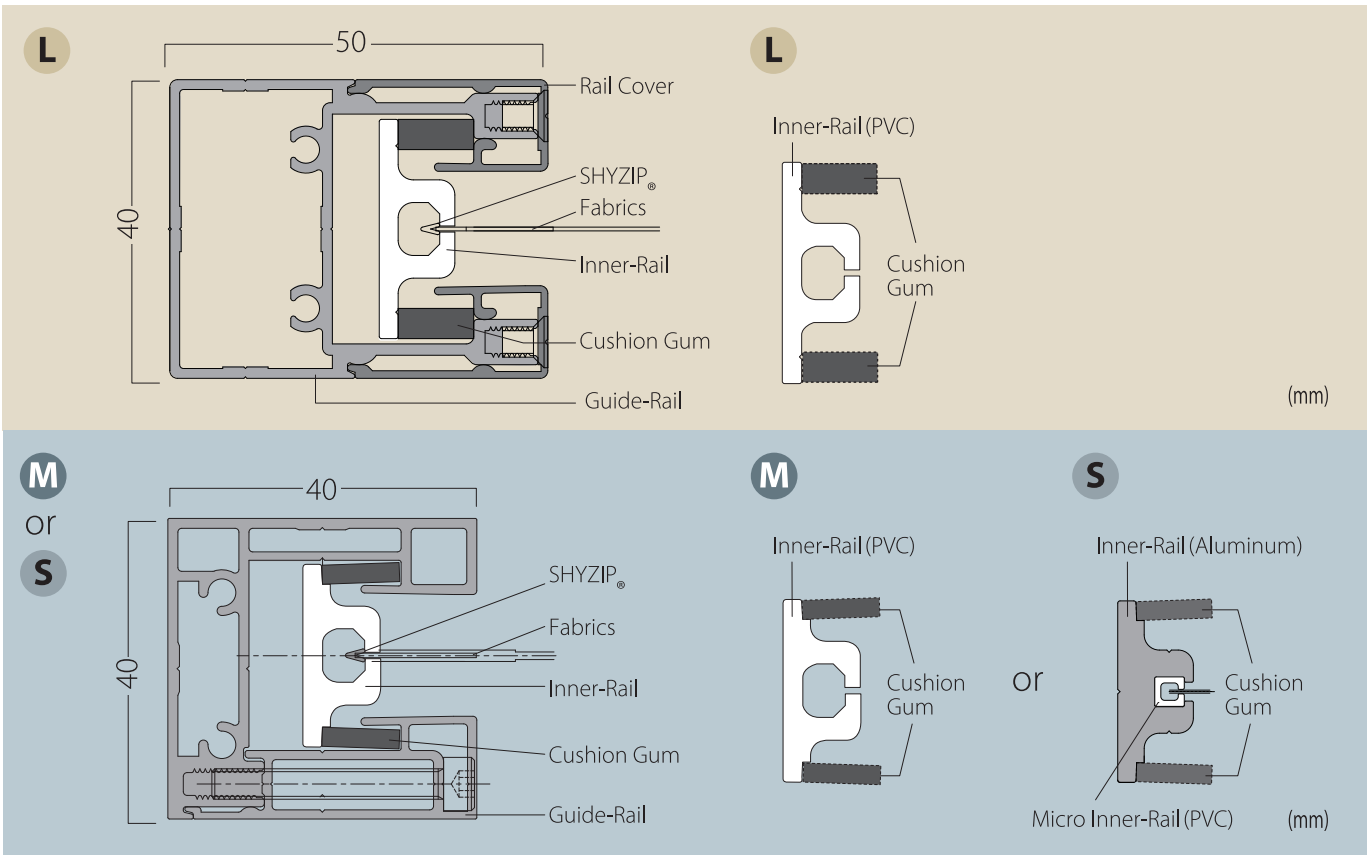

SHYZIP-GR- L/M/S
COLOR : White / Black / Silver

Inner-Rail

SHYZIP-IR- L/M/S
COLOR : White / Black

Micro Inner-Rail

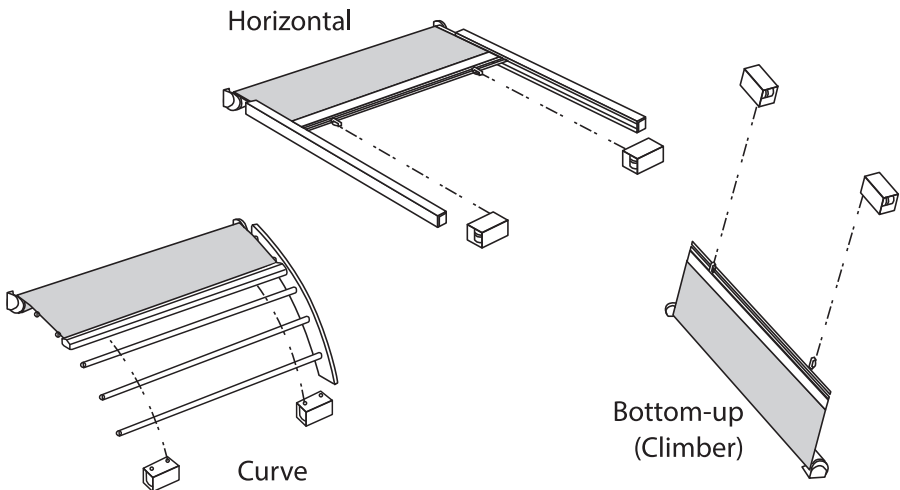

SHYZIP-MR- S
COLOR : White / Black

SHY CONSTON SYSTEM

Features

With "SHY CONSTON" applied, the constant torque revolving mechanism can be obtained.

CONSTANT FORCE SPRING

The output hardly changes its value regardless of the wire length.

Comparison with Spiral spring

The output hardly changes its value regardless of the rotation number.

Able to rotate almost its full length.

Constant torque maintains over a long time.

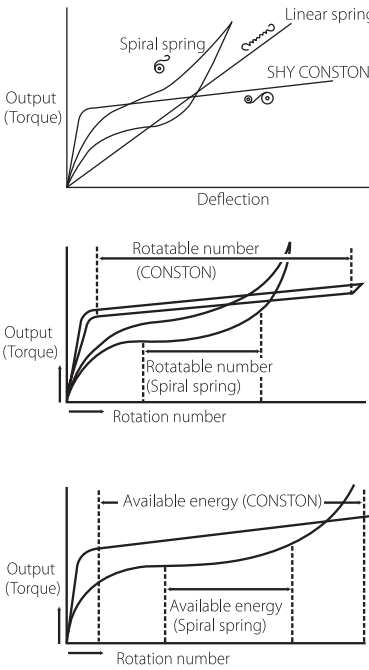

High efficiency, no energy loss due to without friction between coils.

Thus no need lubricating oil.

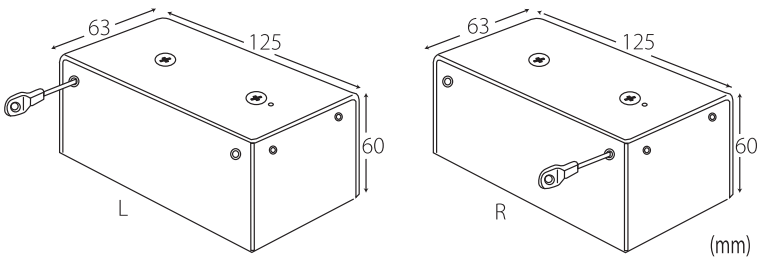

The output reaches high level immediately with slight rotation.

With constant output, adjustment by governor is unnecessary in many case. Structure is simple,thus, troubles seldom occur.

Torque is not elevated with higher coiling tightness. Thereby, coilling can be made easy, and parts with less strength can be used.

SHY CONSTON75

SHY CONSTON75 (L/R Pairs)		
ITEM	Torque	Wire length
CS7512M	1.2kgf	3,000mm
		4,000mm
CS7528M	2.8kgf	3,000mm
		4,000mm
CS7532M	3.2kgf	3,000mm
		※4,000mm

MOQ:15pairs~

TAIPEI NAN SHAN PLAZA (TAIWAN)

We have supplied our SHYZIP inclination system to “TAIPEI NAN SHAN PLAZA” which is developed by Taiwan’s major company encourages and values active contribution to society, “Nan Shan Life Insurance Company, Ltd.”

TAIPEI NAN SHAN PLAZA consists of 3 areas: shopping mall, office tower and cultural facility.
The office tower is 272m height designed as the signs of putting palms together which express gratitude to people.

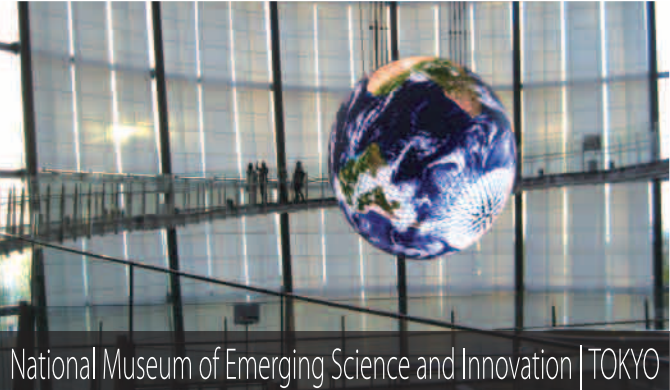

TAIPEI NAN SHAN PLAZA Office tower

Owner/Developer	Nan Shan Life Insurance Company, Ltd.
Address	No. 3, Songlian Road, Xinyi District, Taipei City, Taiwan
Design	Mitsubishi Jisho Sekkei Inc.
Specification	Manual Roller Shade (CRF-65R) ZIP System Chain operation W 1,905mm × H 2,680mm 2,208 units
Site area	17,708㎡
Total floor area	201,800㎡
Construction	Reinforced Concrete
Scale	45stories above ground and 5 below 272m Tall
Start of construction	November 2013
Completion	March 2018

To be found everywhere
SHY SALES RESULT

200,000 windows

The easiest way to find a solution. SHY is here for you!

Environment-friendly

Various angles

Various window shapes

NO-joint

Privacy and comfort

Compact and easy-to-install

Big and durable

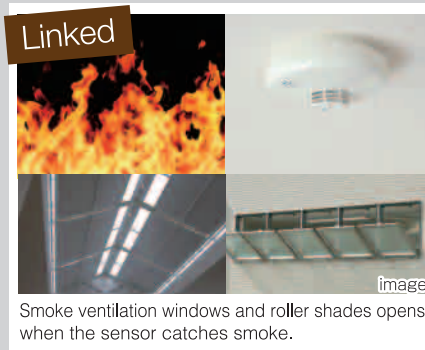

Block the light, sounds, heat, dust...

Expand the possibility of design

Total lighting control using media channels

Multiple Functions

Train Windows

SHYZIP® is designing the Environment.
